To Whom It May Concern:

It is my pleasure to provide a recommendation for Tom Susic. Graduating from the SetFocus Master's Program, Tom Susic excelled in an intense, integrated, in-depth, full time, 3 month .NET Developer Training Program.

I was impressed by Tom's ability to work with many technologies during his time with SetFocus. Tom has gained experience with the latest Microsoft Technologies, including but not limited to C#.NET, ASP.NET, NET Class Libraries, ADO.NET, .NET remoting, and XML Web Services, writing about 8,000 – 10,000 lines of code. In addition, Tom has established competency with SQL Server Design and Implementation and developing web applications.

I found Tom's work ethic was demonstrated by his ability to work in an environment with firm deadlines, very large workloads, and complex specifications. Tom creates code in a time efficient manner, is flexible with specifications changes and is able to work within teams on assigned projects.

I recommend Tom as a solid addition to your development staff. If you would like more information, I'd be happy to provide it.

Sincerely,

Robert Witkowski  
Dean of Students
